### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to the applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 30, line 3: added --decoder-- after "row".

The amended change addresses/corrects a minor oversight by the examiner, wherein claim 30's previously presented phrase "row and driver circuits" will now cite --row decoder and driver circuits-- for consistent labeling (e.g. see "row decoder and driver circuits" and "row decoder and driver circuit" cited within claim 29, lines 2-3 and/or 5). This change does not affect the scope of the claims.

### **RESPONSE TO AMENDMENT**

The amendment submitted on Jan 6, 2009 was reviewed and considered with the following results:

The cancellation of claims 1-3, 10-13, 16-18, 32-33, and 35-37 rendered their rejections, described on pages 3-8 of the previous Office Action, moot.

Although the remaining claims (i.e. 19-24, 26, and 29-31) had been identified as being allowable on page 8 of the previous Office Action, one minor objection was noted within claim 30 when all the claims were carefully reconsidered. This oversight was addressed/corrected by the Examiner's Amendment described above.

Therefore, there is no known objection or rejection remaining within the present application.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

None of the prior art references reviewed and considered shows or discloses a six transistor integrated circuit device as cited within independent claim 19. More specifically, none of the references clearly shows or discloses the third and fourth MOS transistors with a thin gate insulation layer; the fifth MOS transistor controlled by a first input signal; the sixth transistor controlled by an inverted version of the first input signal; a first internal node (between the first and third MOS transistors) coupled to a row decoder and driver block for selectively driving word lines of a memory device; and the input signal includes a row address signal and a block selecting signal from the memory device as cited within claim 19, upon which claims 20-24, 26, and 29-31 depend. Since there is no motivation to modify or combine any prior art reference(s) to ensure all of these claimed limitations are met, the claims are deemed patentably distinct over the prior art of record.

Claims 19-24, 26, and 29-31 are allowed and have been renumbered as 1-10, respectively for printing purposes. The renumbering takes the cancellation of claims 1-18, 25, 27-28, and 32-37 into account.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication from the examiner should be directed to Terry L. Englund whose telephone number is (571) 272-1743. The examiner can normally be reached Monday-Friday from 7 AM to 3 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lincoln D. Donovan, can be reached on (571) 272-1988
